

REQUEST FOR PROPOSAL (RFP)

Smart Campus Management System

1. Client

ABC Institute of Technology

2. Project

Smart Campus Management System

3. Project Description

ABC Institute of Technology invites proposals from qualified software development companies to design and implement a web-based Smart Campus Management System. The system will provide a centralized platform for managing student information, faculty information, attendance, announcements, events, and campus facilities.

4. Requirements

The proposed system should provide secure user authentication, student and faculty management, attendance management, event management, announcements, facility information, search functionality, and an administrative dashboard.

5. Technical Requirements

The application should use a responsive web interface and provide REST APIs. The backend should use Python or Node.js. The database should be PostgreSQL or MongoDB. The system must support role-based access control, secure password storage, HTTPS, input validation, and regular database backups.

6. Deliverables

The selected vendor shall deliver the complete web application, source code, database schema, REST API documentation, deployment documentation, administrator documentation, user documentation, testing report, and one training session for administrators.

7. Timeline

The project is expected to be completed within 16 weeks from the date of contract signing. A proposed schedule should include requirements analysis, design, development, testing, deployment, and training.

8. Budget

The estimated project budget is INR 12,00,000 to INR 15,00,000, inclusive of development and initial deployment costs.

9. Eligibility Criteria

The bidder must have at least 3 years of experience in web application development and must have completed at least two similar software projects. The bidder should provide company registration details, relevant project references, and details of the proposed development team.

10. Evaluation Criteria

Proposals will be evaluated based on technical approach, relevant experience, proposed development team, project timeline, security approach, support plan, and commercial proposal.

11. Constraints

The solution must comply with applicable data protection requirements. The application must support at least 5,000 registered users and should be designed for future scalability. All source code developed specifically for this project shall be provided to the client.

Submission Information

Proposals must be submitted electronically in PDF format. The proposal should include a technical proposal, implementation plan, company profile, team details, relevant experience, commercial proposal, and contact information. The submission deadline is 30 November 2026.
